

SOCIAL and PERSONAL

Mr. and Mrs. John H. Ritsbeck of Pittsburgh, formerly of Connellsville, will give a reception tomorrow night at 8 o'clock at the Moose Hotel, Pittsburgh, in honor of Judge and Mrs. C. L. Burnett, who are visiting in Connellsville. The reception will be an event of January 23. Mrs. Burnett was formerly Mrs. Mildred E. Hall of Washington, D. C., and Ronsko, Va. Judge Burnett is a brother of Mrs. Ritsbeck.

The Young Men's Social Club will meet tomorrow evening at the home of Dr. G. W. Gallagher in Sixth street, West Side, instead of this evening.

The regular meeting of J. O. G. Jr. Class of the First Methodist Episcopal Sunday school, will be held Friday evening at the home of Miss Maude Weaver in South Connellsville. Mrs. L. S. Michael's class is invited.

Mrs. A. B. Stouffer will entertain the Ladies' Aid Society of the First Baptist Church tomorrow evening at 8 o'clock in North Third street, West Side. The regular meeting and all members are invited.

Members of Edith Ribben Lodge have been extended an invitation to a meeting of Julia Lodge of Mount Pleasant Saturday evening to meet the state officers. An interesting program will be rendered. Those going from here are requested to leave on the 6:50 o'clock street car.

Veterans of the Civil War are guests this afternoon of the Ladies' Circle No. 100, at the Grand Army of the Republic. The meeting is being held in Odd Fellows hall.

The Boys' Mission Band of the First Presbyterian Church will meet tomorrow afternoon after school at the home of John Satter in East Washington avenue. All members are invited.

Owing to the extremely cold weather, delays of trains and other causes, a meeting for Sunday school workers scheduled for Monday night in the Christian Church was not held. There will be a meeting Friday evening at 7:30 o'clock in the South Connellsville Evangelical Church. The two principal questions for consideration are "Lutheranism" and "Evangelism." All persons interested in Sunday school work are urged to attend.

Mrs. T. G. Kincaid will entertain tomorrow evening at her home in West Cedar avenue in honor of her niece, Miss Gladys Hauke. The guest list will include a number of Miss Hauke's friends.

Business of a routine nature was transacted at the regular meeting of the Woman's Guild of the Trinity Episcopal Church held yesterday afternoon at the home of Mrs. S. E. Long in South Pittsburgh street. Refreshments were served.

A well-attended meeting of the Woman's Home and Foreign Missionary Societies of the First Presbyterian Church was held yesterday afternoon in the church. The Foreign Society held the first meeting. Miss Sarah Allen presiding over the devotional exercises. Mrs. L. L. West read a paper on "China." A paper on "Korea" read by Mrs. H. G. May concluded the program. The Home Society held a short meeting, business of a routine nature being transacted.

An interesting meeting of the Ladies' Auxiliary to the Order of Railroad Conductors was held yesterday afternoon in Odd Fellows hall. There was a large attendance and following the business meeting refreshments were served.

Announcement has been made of the marriage of Miss Freda M. Miller, and

HOW I DARKENED MY GRAY HAIR

Lady Gives Simple Home Recipe That She Used to Darken Her Gray Hair.

For years I have tried to restore my gray hair to its natural color with the prepared dyes and stains, but none of them have satisfied me and they were all expensive. I finally ran onto a simple recipe which I mixed at home that gave me wonderful results. I gave the recipe, which is as follows, to a number of my friends, and they are all delighted with it. To 7 oz. of water add a small box of Barbo Compound, 1 oz. of bay rum and 1 oz. of glycerine. These ingredients can be bought at any drug store at very little cost. Use every other day until the hair becomes the required shade. It will not only darken the gray hair but make it soft and glossy. It is not sticky or greasy and does not rub off.—Adv.

BE CAREFUL WHAT YOU TAKE FOR A COLD

The stimulants and dangerous drugs which many "cough balm" and patent medicines depend on for their temporary effect endanger the health and even the lives of those who take them. Because it is free from alcohol, narcotics and dangerous drugs, Father John's Medicine has had 50 years of success in the treatment of colds, coughs, throat troubles and as a tonic and body builder. Father John's Medicine is a doctor's prescription—pure and wholesome. Guaranteed.

Mrs. Laura Piersol has returned home from a visit with relatives at Burgettstown. Peter Toulin, who has been ill of pneumonia at his home on Sycamore street, South Side, is able to be about in his room today.

Even grandpa will be at the Exposition.—Adv.—1-11.

By making a deposit of 50 cents we will hold for you the picture, "A Little Bit of Heaven." E. G. Hall, South Pittsburgh street.—Adv.—2-1.

Proprietary address is the home of "Patricia" at the Orpheum today.—Adv.

Get your valentines at Artman & Work. A full line of fancy and comical, 10, 20, 50 and 100.—Adv.—3-1.

"Patricia" has thrills in abundance at the Orpheum today.—Adv.

A business meeting of the Philip Freeman Chapter Daughters of the American Revolution will be held this evening at 7:30 o'clock at the home of Mrs. J. S. Bryner in Vine street.

The Young Ladies' Guild of the Trinity Reformed Church will meet tomorrow evening at the home of Mrs. Buchanan Rudolph in East Washington avenue.

Miss Martha Tibbels, who recently underwent an operation at St. Joseph's Hospital, Pittsburgh, for appendicitis, left this morning for a visit with relatives in Bloomington, Md., before returning to her work in W. S. Anderson's office of the West Penn Railways Company.

Mrs. P. L. Sheppard was hostess at a charmingly appointed one o'clock luncheon yesterday afternoon at the Brunswick hotel, Uniontown. Sweet peas intermingled with maiden hair formed the attractive centerpiece. The place cards were daintily hand painted affairs adorned with sweet peas. Covers were laid for Mrs. James Buttermore, Mrs. S. G. Zimmerman, Mrs. S. S. Snader, Mrs. E. B. Burgess, Mrs. J. B. Marietta, and Mrs. Lydia Percy.

Miss Pearl Buttermore, daughter of Mr. and Mrs. A. J. Buttermore of Lincoln avenue, and Joseph Rhodes of Mr. and Mrs. Henry Rhodes of Morrill avenue, Greenwood, left last night on Baltimore & Ohio train No. 10 for Cumberland to be married. Last night at midnight Mr. and Mrs. Rhodes were told by a friend of their son that he was leaving for Cumberland and would return home Monday. Miss Buttermore, who was an operator for the Bell Telephone Company, left home last night ostensibly to spend the night at a neighboring home. This afternoon her parents had received no word of the marriage. Mr. Rhodes is principal of the Blinn schools, Franklin township. Both the young people were graduated from the Connellsville high school, members of the class of 1913.

PERSONAL. Sonson Theatre today—"Liberty," No. 12. "The Fugitive," with Louise Lovely. "Hell by the Enemy," comedy. Tomorrow Mabel Trunnelle in "The Master Passion."—Adv.

Mrs. Calvin S. Ficus and daughter, Mrs. Walter S. Wible, of Greensburg, are visiting Mr. and Mrs. B. D. Smith of Patterson avenue.

For the balance of this week Anderson & Loucks Hardware Company will have a special man from the factory demonstrating the exclusive features of the New Method Range. See them at the exposition.—Adv.—3-21.

James Kregor of Confluence, in the guest of Mr. and Mrs. L. V. Rush of South Prospect street.

Don't stop me, I'm on my way to the Exposition at the Armory.—Adv.—1-11.

A. A. Corristan, a funeral director at Ohiopyle, was in town yesterday on business.

"Not the largest store in town, but growing the fastest." Why? Service, style, satisfaction. Brownell Shoe Company.—Adv.

Mr. and Mrs. J. R. Scroyer and son Jack, of Carmichaels, have returned from a four month's stay at Orlando, Fla., and are visiting Mr. and Mrs. F. R. Graham of Chestnut street. Mr. Scroyer is a brother of Mrs. Graham.

Mrs. Vernon Castle shoots with a true eye in "Patricia" at the Orpheum today.—Adv.

Mrs. Sarah Markle of Crawford avenue, went to McKeesport this morning.

See Clara Kimball Young in "The Foolish Virgin," February 12, 13 and 14 at the Solsman Theatre. Prices, children 10 cents; adults 15 cents.—Adv.

Miss Adelaide Myers of Mount Pleasant attended the Connellsville Exposition last night.

Mrs. Vernon Castle is in town today at the Orpheum in "Patricia."—Adv.

Miss Dorothy Edmunds of West Green street, is visiting her uncle, Dr. F. E. Edmunds of Donora.

Don't fail to see and hear the talking machines displayed at the armory this week by A. P. Freed.—Adv.—3-21.

CREAM FOR CATARRH OPENS UP NOSTRILS

Tells How To Get Quick Relief from Head-Colds. It's Splendid!

In one minute your clogged nostrils will open, the air passages of your head will clear and you can breathe freely. No more yawning, sniffling, blowing, headache, dryness. No struggling for breath at night; your cold or catarrh will be gone.

Get a small bottle of Ely's Cream Balm from your druggist now. Apply a little of this fragrant, antiseptic, healing cream to your nostrils. It penetrates through every air passage of the head, soothes the inflamed or swollen mucous membrane and relief comes instantly.

It's not fine. Don't stay stuffed-up with a cold or nasty catarrh—Relief comes so quickly.—Adv.

The Grim Reaper

GOTTLIEB RITCHARD. Gottlieb Ritchard, a former well known mill worker at Scottdale, and for the past two years a resident of Brownsville, died suddenly of heart failure yesterday at the home of Mr. and Mrs. Charles E. Shields in Brownsville. Funeral Friday afternoon at Scottdale, with interment in the Scottdale cemetery. Deceased was a pensioner of the United States Steel Corporation. He was born in Switzerland in 1843 and came to America when 24 years of age. He married Miss Mary Cunningham of Sunbury, and afterwards moved to Scottdale, where he worked in the mills until he was pensioned in 1914. Since that time Mr. and Mrs. Ritchard made their home with their son-in-law and daughter, Mr. and Mrs. Shields. In addition to his widow and one daughter, Mr. Ritchard is survived by a son, Frank Ritchard, of Scottdale.

FRANK B. HAMBRAY. Frank B. Hambray 71 years old, a former well known resident of Connellsville, died this morning at 9:45 o'clock at his home at Donora. Funeral Sunday with interment in Uniontown. Mr. Hambray resided at Connellsville for a number of years being in the employ of the Baltimore & Ohio railroad about 40 years ago. For some time past he had resided at Donora. He married Miss Alice Virginia Kremer of Uniontown, in addition to his widow he is survived by the following children: Mrs. William B. Curry of Pueblo, Col.; Mrs. H. Claude Farquhar of Monaca, Pa.; Thomas Hambray of Pittsburgh; Mrs. G. W. Boyd of Donora; Misses Florence and Mary Hambray and Fred Hambray at home.

MRS. WILLIAM HARDWICK. Mrs. William Hardwick of Brownsville, died yesterday morning as the result of a stroke of paralysis. Funeral Sunday afternoon at 2 o'clock.

MRS. SUSAN MCCANN. Mrs. Susan McCann, 86 years old, died Tuesday afternoon at her home in Brownsville of a complication of diseases.

MRS. ELIZABETH MURRAY. Mrs. Elizabeth Murray, a former resident of Brownsville, died yesterday in Pittsburgh. Deceased was the wife of Harrison Murray of Bridgeport, Pa. The body arrived at Brownsville today and tomorrow morning will be taken to the Hopewell Church at Mount Pleasant for services. Deceased is survived by her husband and five children.

EDWARD SWINISH. Edward Swinish, the one year old son of Mr. and Mrs. Martin Swinish of Raineytown, died this morning. Interment tomorrow morning in the Catholic cemetery at Dickerson Run.

PRIZE NIGHT DRAWS HUNDREDS TO EXPO; SUCCESS IS ASSURED

Continued from Page One.

by Mrs. Edward Henry, R. E. D. No. 2 City, who guessed 1,675. The correct number was 1,622. The second prize went to Mrs. Weldinger, who guessed 1,510.

Just before the drawing of the prize winning numbers, Mrs. Helen Markell Knox sang. A selection which was accorded applause was "Columbia, The Gem of the Ocean." Miss Martha Eaton will sing this evening and on Friday, Mrs. Margaret Davies Newcomer, will be the soloist.

This afternoon the school kiddies were again admitted free and there was a large increase in the attendance. Many little treats were given out by those in charge of the booths.

The committee wants it understood that although certain afternoons are set aside for free admission of ladies and kiddies, others may also attend.

Friday night will be automobile night and auto exhibitors will have the floor. The exhibit of the fine machines has been a center of attraction all week but tomorrow night the demonstrators will point out their good qualities. Two prizes will also be given in drawings by the automobile exhibitors. The West Side garage will give a J-M Fire extinguisher, and the Wells-Ville Electric Company, an automobile flashlight or an automobile robe.

Social at Dunbar. A successful box social and parish party was held last night at the parish house of St. John's Episcopal Church at Dunbar for the benefit of the building fund. There were various amusements, including a basketball game, and all present had a very delightful evening.

Secures Dunbar Position. Donaldu McClary of the West Side, is a new clerk for the Dunbar Supply Company.

Hospital Cases. Miss Elizabeth Brilerley of South Connellsville, was admitted to the Cottage State Hospital for an operation. Joseph Boyatz, a West Side butcher, underwent an operation this morning.

Judge Work 55. Friends are extending hearty congratulations to Judge J. C. Work of the Fayette county orphans' court today, upon his attainment of the age of 55 years.

Get Marriage License. Daniel Snyder and Mary Jane Byers of Vanderhill, were granted a marriage license in Greensburg yesterday.

PIMPLY? WELL, DON'T BE!

People Notice It. Drive Them Off with Dr. Edwards' Olive Tablets

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the tablets a few nights.

Cleanse the blood, the bowels and the liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel—there's never any sickness or pain after taking them.

Dr. Edwards' Olive Tablets do that which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating.

No one who takes Olive Tablets is ever cursed with a "dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil; you will know them by their olive color.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints and Olive Tablets are the immensely effective result.

Take one or two nightly for a week. See how much better you feel and look. 10c and 25c per box. All druggists.

It Will Pay You to read our 4-column columns.

EVERSON FIREMEN MEET

Newly Elected Chief, Dr. M. A. Noon, Entertains Company.

The officers and men of the Everson fire department were entertained last night in the Tyrone hall at Everson by Dr. M. A. Noon, recently elected chief of the department.

Howard D. Barkell was the principal speaker of the evening. Mr. Barkell, who is leader of the Everson band, spoke of the progress of the company in recent years. George Hughes, a member of the organization, told of some of his experiences while serving aboard a British steamer back in 1898. James Keegan and Emanuel Malak, ex-chief of the fire department, also made brief addresses. Dr. Noon acted as toastmaster.

The Everson fire department is known throughout Western Pennsylvania as one of the finest volunteer companies of the section. It has a membership of 100. The new officers are: Chief, Dr. M. A. Noon, assistant chief, James Clytes; captain, William Dannaker; assistant captain, D. J. O'Brien; first lieutenant, Charles Nowakewy, and second lieutenant, Charles Thomas.

Is About Again. M. J. Fitzgerald, labor foreman for the American Manganese Manufacturing company at Dunbar was able to be out yesterday after being confined to his home with a burn on his right leg.

Children's Headaches

Nine times in ten the headaches of children are caused by defective vision.

If you have a case of child's headache in your home the right thing to do is to let us make an examination, without "drugs," drugs, danger or inconvenience.

If the headache is due to an error of refraction, I can correct the error and the headache will disappear.

A. L. Tucker, Oph. D. EYE SPECIALIST, 104 S. Pittsburg St., Connellsville.

FIRES IN SCHOOL COME AT MID-YEAR EXAMINATION TIME

Think This May Have Something to Do With Blazes in High School Building.

LITTLE DEFINITE LEARNED

Authorities Admit Fires were of Incendiary Origin: Fire Department May Add Pump to One Truck For Use When Pressure Is Poor.

Special to The Courier.
SCOTSDALE, Feb. 8.—Dr. O. I. Hess, secretary of the local school board, stated last night that nothing new had been learned concerning the origin of two fires which broke out at the high school building the early part of the week. Members of the school board met yesterday morning at the high school building to remedy the damage as far as possible, done by the blaze on Tuesday night and trying to discover the cause.

Mr. Hess did not deny that the fires were supposed to be of incendiary origin. There was nothing in Superintendent Marsh's office likely to start a fire, none of those who use it being smokers and there being no matches about.

It was talked on the streets here yesterday that whoever started the fires was after examination papers as the mid-years were scheduled to start Wednesday. Nothing definite was known concerning this.

May Install Pump.
The local fire department is considering adding a pump to one of its fireless trucks. This with the other two fireless trucks, which each carry 600 feet of hose, and the 1,000 feet that could be used by the pump would be a handy "water pressure" were low.

Mrs. Storer Host.
Mrs. John P. Storer entertained the Ladies' Missionary society of the United Brethren Church at her home on Walnut street yesterday afternoon. The meeting was in charge of Miss Bertha Cowling, who then offered secretary, and the amount received by the society was \$58. A pleasant social hour followed the program.

Missionary Society Meets.
The Foreign Missionary society of the Methodist Episcopal Church met in the church yesterday. The roll call was in charge of Mrs. Hugh Francis. Mrs. J. P. Strickler presided and following routine business, Mrs. Warner read a leaflet on "Liquor Traffic in the Mission Field." Mrs. Howard read "Through Japan by Judo," and Mrs. J. E. Keith read "A Side Trip to Korea." Arrangements were made for a thank offering meeting for March.

Hard Game Tonight.
When Scottdale meets Latrobe of the Interscholastic basketball league at Millworth Park tonight, Scottdale's original team, composed of Spruill, Guest, Lee, Horne and Carroll, will play, and Latrobe will have its "Lafayette" team on which are Markoy, Arts, Lysouth, Deeg Snyder and Buck Snyder. This promises to be the hardest game for the local team this year.

Notes.
Mrs. Ida Thomas of Brownsville is visiting friends here.
Mrs. J. R. Smith has been taken to the Greensburg hospital for treatment.

Mr. and Mrs. Thomas Diekin spent Tuesday in Pittsburgh.
Mrs. Theodore Kenner, Frank Kenner and Mrs. William Kenner were in Pittsburgh yesterday attending the funeral of Mrs. Matthew McCandless, who for some time made her home here.

North Scottdale.
Miss Goldie Bergstrom and Esther Carlson were Greensburg visitors Sunday.
Fred Carlson and family from the white school house, spent yesterday with the former's brother, Charles Carlson.

There being no fire at the Alverton high school Monday there was no school.
Ernest Palmberg, who has been on the sick list for several months, has returned to his work.

The Summer and Webster Literary societies of the East Huntingdon high school will render a program Friday afternoon.

Buy Casting Company.
The United States Steel Casting Company recently incorporated in West Virginia with a capital of \$1,000,000, has purchased the plant of the National Casting Company, New Cumberland, W. Va.

EVERYONE LOVES A STRONG HEALTHY BABY

If your baby is deprived of mother's milk, play "safety first." Get the food most nearly like mother's milk. This is Thompson's Food (Peptonized). Pure, sweet milk, scientifically modified on a large scale. Your baby will thrive on it and you will be delighted, for everyone loves a strong, healthy baby. Thompson's Food (Peptonized) is not a milk modifier, but a complete food in itself. It is very easily prepared by the mere addition of water. Its use eliminates the danger usually associated with the local milk supply. Endorsed by physicians everywhere. Made by Thompson's Malted Food Co., at Waukegan, "The City of Springs."

We suggest that you try a 50c package with our guarantee of satisfaction.

CAPTAIN JACK CRAWFORD, "PORT SCOUT" KNOWN AS WRITER AND LECTURER

CAPTAIN JACK CRAWFORD

Captain Jack Crawford, a picturesque survivor of Indian fighting days and known throughout the United States for many years as "the port scout," was reported as seriously ill at his home at Woodhaven, N. Y. Captain Crawford is in his seventieth year. In recent years he had visited many of the cities of the United States as an entertainer and had delighted thousands by his verse, his recital of experiences on the frontier and his stories of service with General Custer.

OPENING GAME FRIDAY NIGHT

City League Brings Broad Ford and Mount Braddock Together.

The first game of the Fraternal & Business Men's Basketball league will be played Friday night at Macabee hall between Broad Ford and Mount Braddock. Both teams are made up of good material.

The preliminary game will be played between the married team of the Lady Macabees and the Overholt girls. The Macabee five has been showing up better lately and although Overholt is rated as one of the strongest five teams in the county, the lodge team is expected to provide the hardest race of the year.

The league games will be played every Tuesday and Friday. Tuesday's game will be between the Moose club and the Baltimore & Ohio. The Moose organization is sparing no efforts to get a winning team on the floor and Manager Groes is determined to have his team among the leaders.

Hannigan, formerly of the Macabees, will play for the Baltimore & Ohio team. Goodman, also a Macabee, may be on the Elks' team.

Smithfield.

SMITHFIELD, Feb. 8.—Council met in regular session Tuesday night with Benson, Gulher, Jones, Cooley and Crow present. Only business of a routine nature was transacted. Councilman Gulher suggested that when the next tax levy was made that the levy for borough purposes be the same that of last year with an additional two mills as a sinking fund. This suggestion was taken under advisement and will be taken up at the proper time. A communication from the Department of Labor and Industry requesting the borough to send representatives to a meeting of the State Association of Boroughs, which meets in Harrisburg in April, was laid on the table. Orders were drawn for the payment of outstanding bills.

Rev. Ralph Bell has brought his series of special services at the Methodist Episcopal Church to a close with good results.

Allen Bolon of Woodbridgestown was a borough business visitor Wednesday.

John H. Moser of Andersons Cross Roads was a borough business visitor Wednesday.

Confluence.

CONFERENCE, Feb. 8.—Born—To Mr. and Mrs. John Trebble at Frank's hospital a fine baby girl. This makes two girls and a boy in the family.

The Ladies' Aid of the Lutheran Church will meet at the home of Mrs. W. H. Reiber this evening.

Mrs. James R. Brown, who has been very ill, is improving.

E. Vassilek of Ursina was in town on business yesterday.

James Kregar of Drakestown was here yesterday on his way to Connelldale to visit friends.

Mrs. C. G. Masters has returned from a visit with friends at Meyersdale.

Louis Gaus of Uniontown is visiting Mr. and Mrs. John Davis at present.

PREPARING TO SELL IN AMERICA

German Steel Makers Planning to Make Heavy Shipments to This Country After Close of War.

The Manufacturers Record learns that some of the big steel companies of Central Europe, believing that the war will end within six months, are already laying their plans for heavy shipments to this country. They are even now negotiating for advertising space in American papers, intending to carry on a very aggressive campaign through the American market. A well-informed German living in New York, who is in touch with the situation, advises the Manufacturers Record that all leading German houses will, at the close of the war, make a strong effort to build up their foreign trade, the moment their shipping facilities are released.

In this connection it is said that German merchant steamers now tied up at home ports are practically all ready to load and sail for this country the moment peace is declared, and it is interesting to note that statements are being made that many, if not all, of the interned German ships in American ports have been changed from coal to oil burners, have on board a full supply of fuel oil and will be ready to move the moment the time for their release comes.

It is stated that these large Central Europe steel manufacturers are taking the ground that within six months the war will have ended, or that an armistice will be declared for the purpose of peace negotiations, and that when this is done, they say "fighting will never be resumed." It is in view of this situation that these manufacturers are already figuring on the heavy advertising campaign in America.

Dawson.

DAWSON, Feb. 8.—Byrne Little has returned to his home in Greensburg after a few days' visit with his brother, Daniel, in Lower Tyrone.

William Coleman, formerly of East Liberty, was a recent visitor at the home of Frank Merrill, Dickerson Run. Mr. Coleman is now employed in Akron, O.

Raymond Boyd was calling on friends in Connelldale Tuesday.

Edward Cramer and Clarence Newell of Dickerson Run were in Connelldale Monday.

Earl Lint of McKees Rocks was calling on friends in Dickerson Run recently.

Albert Newcomer, who was confined to his home in Lower Tyrone with pneumonia the past few weeks, was in town Wednesday.

A. Van Horn and George Moore were recent business callers at Uniontown.

Mrs. Arthur Fieldson has returned home from a visit with friends and relatives in West Newton.

Daniel Little was in from the country Tuesday.

Earl Porter was a business caller in Uniontown Wednesday.

Alex Pringle of near Broad Ford was a Dawson visitor Wednesday.

Rockwood.

ROCKWOOD, Feb. 8.—The oil house of the State Line Coal company caught fire at their mines in South Rockwood Monday evening about 7:45 and was completely destroyed. Several barrels of oil and some machinery was burned. The loss is estimated at \$500.

Mrs. F. R. Maxwell of Clearfield is spending several weeks as the guest of her parents, Mr. and Mrs. G. C. Miller of Rockwood.

Mrs. Margaret Hoover Wolmer, 80 years old, died at the home of her daughter, Mrs. Elias Hochler at Casselman, on Monday. Interment and funeral services were held at the Pleasant Hill cemetery and church. She is survived by six children.

H. Snyder of town spent Tuesday in Somerset on business.

E. E. Miller is spending several days in Johnstown on business.

Attorney G. B. Day of Baltimore has returned home after spending three weeks with his brother and sister-in-law, Mr. and Mrs. W. M. G. Day of Rockwood.

The evangelistic services conducted by Mr. Dunlap under the auspices of the United Brethren Church will close this evening.

POWDERED COAL

Its Use Tending To Stimulate the Pittsburgh Coal Market.

Demand for coal is heavy. The use of powdered coal in open hearth furnaces has tended to stimulate the market in the Pittsburgh district. Many steel works managers have installed powdered coal equipment on account of the shortage of gas.

The Carnegie Steel Company eventually will use powdered coal in 24 open hearth furnaces at Homestead, having already equipped 12 furnaces for this kind of fuel. At the Clairton works of the Carnegie company, eight furnaces are being heated by powdered coal. Several other manufacturers are talking about installing powdered coal equipment at an early date.

"BIG BUSINESS MEN"

Know the Importance of Keeping Posted.

Some large concerns pay thousands to maintain an information Bureau. Realizing that all business men cannot do that, the First National Bank issues a reliable Monthly Trade Review, giving prevailing conditions in all lines. It will keep you posted and its free. Send address to the bank—Adv.

Will Double Capacity.

The Dayton Malleable Iron Works, Ironton, O., has announced that, beginning early in the spring, it will double the capacity of the plant.

Only a Few Hoosiers Left

Tomorrow May End It—No More When These Are Gone

Never have we seen the women of this district respond to a kitchen cabinet sale as they have to this one which opened Saturday. The reason is plain:

Many have intended to get the celebrated Hoosier. Nearly every woman wants one. And this cut-price on "Hoosier Special" cabinets would create a sensation even in normal times.

Buy NOW—in the face of rising costs on goods of all descriptions—it brings an unheard of bargain!

Choicest Materials—Supreme Workmanship

The sliding table top—39 inches by 42 inches—is pure aluminum, and this rare substance has doubled in cost. In fact, the Hoosier is made of the finest materials throughout, and every bit has gone up enormously since the war.

Except for the makers' foresight in buying ahead, their tremendous output and our profit-sacrifice, this value would be utterly impossible.

In Your Kitchen for \$5

Don't wait till some proud friend of yours shows you this beautiful cabinet in her kitchen. You will long to have this cabinet.

But the price will be back to \$5 more than now. The Hoosier Company has given us positive instructions that the regular price must be resumed on our next lot of "Hoosier Specials."

So if you have the least idea of ever getting a kitchen cabinet—tomorrow is the time! But only a very few remain and any hour may end it. Come early to be safe.

One dollar, remember, is all you need to deposit. Pay the balance \$1 a week. Your money all back if you are not delighted.

Orders accepted by telephone—but no reservations can be made unless an order is given.

Bell Telephone 168.
Tri-State Telephone 106.

AARON'S

ALLCOCK PLASTERS

The World's Greatest External Remedy.

Pain in Side, Rheumatism, Backache, Any Local Pain.

Exhibit on Having ALLCOCK'S.

Authorized Terms of Sale

- 1—Pay only \$1 the "Hoosier Special."
- 2—Pay the balance only \$1 a week.
- 3—No interest, no extra fees.
- 4—Your money all back if you are not delighted.
- 5—Bona fide cut of \$5 in the price, but sale ends absolutely when the few remaining "Hoosier Specials" are gone.

Valuable Hoosier Features

There is plenty of unhampered room above and around the aluminum work-table. No useless little partitions to chop up the space. The HOOSIER gives you a big table space to work on—it gives you 17 vital points not found in all other cabinets combined. Five of these leading features are:

- 1—The All-Metal, Glass-Front Flour Bin.
- 2—The Gear-Driven Shaker Flour Sifter.
- 3—Storage Space for 400 Articles, all within arm's reach!
- 4—Ingenious, Big-Capacity Sugar Bin.
- 5—The New Roll Doors that you can slip out for cleaning.

In all 40 labor saving inventions, each like an extra hand to help in your work. You can sit down at the Hoosier and reach for what you want instead of walking back and forth to your kitchen for miles. Hoosier cuts kitchen work in half.

Sentanel Kidney Pills

Put life into lame backs. Every box makes good. 50c any druggist.

The Sentanel Remedies Co., Inc. Cincinnati, Ohio.

Don't Load Your System With Dangerous Medicines!

KREW-PINA

Gives Permanent Relief

Krew-Pina is a healing, soothing, medicinal value. Used externally it gives quick and permanent relief from many ailments for which many medicines are frequently taken.

Krew-Pina contains no harmful ingredients and will not blister the skin. We absolutely guarantee satisfaction or your money will be refunded.

If anyone in the family has a cold, just apply Krew-Pina to the chest and throat. Use it before retiring and the trouble will disappear overnight.

Krew-Pina is especially good for coughs, croup, tonsillitis, asthma, and bronchitis. Applied in time it has often prevented pneumonia. It is superior to liniments or poultices for muscular aches, such as sprains, bruises, rheumatism, neuralgia, and the like.

You should always have Krew-Pina in your home. Costs only 25c per jar. For sale at your druggist's. Remember our money-back guarantee and buy a jar of Krew-Pina today.

The Sentanel Remedies Co., Inc. Cincinnati, Ohio.

HAVE YOU TRIED OUR CLASSIFIED ADLETS?

OPENING OLD LOG CABIN

Friday, Feb. 9th.

We cordially invite you to the opening of The Old Log Cabin, Friday, February 9th. We will serve Real Pure Ice-Cream FREE. We have provided refreshments for all. In addition, there will be music all day and evening. Do not feel obligated in any way by coming. We want you and you can assure yourself that you are most welcome.

Our complete line of VALENTINES, priced from 10c to 25c, will be on display and sale on that day. Our Magazine counter contains every magazine published. One word in reference to all the CITY PAPERS: Daily and Sunday—we have them every day. Come in for them, you will not be disappointed at any time. Last, but not least, our Soda Fountain has been thoroughly renovated. Sanitation is our hobby. We have employed one of the most competent managers. Our syrups, fruits and ice cream are the best money can buy.

So come in, and when you enter the door, you can rest assured you are most welcome, whether you come to look on or to buy.

NEW FURNACES BEING BANKED DAILY ACCOUNT LACK OF COKE

Pig Iron Production Likely to Drop Under 50% By End of Week.

SPOT COKE IS \$9 TO \$9.50

On Pickup Lots: Commands More For Larger Quantities; Spot Foundry Strong on Its Merits; No Contract Negotiations; Prices Are Nominal.

Special to The Weekly Courier. PITTSBURGH, Feb. 7.—The shortage of coke at blast furnaces is by far the most serious yet experienced, easily overtopping that which occurred at Christmas time. By the beginning of this week 25 or 30 furnaces tributary to the Connellsville region were banked on account of lack of coke and this week the number has been growing daily. As illustrative of the conditions the third of the five Lorain furnaces was banked Monday.

Car supplies in the Connellsville region are estimated at 40 to 50 per cent. on Monday and about 25 per cent. yesterday, with no prospect of much improvement during the balance of the week. The furnaces will feel the shortage most keenly late in the week and it is estimated that before the end of the week the rate of pig iron production at furnaces, steel works and mechanical tributary to the Connellsville region, will be under 50 per cent. of normal.

There are a number of embargoes against the shipping of coke to certain districts, but the embargoes come and go so rapidly that no one ventures a comprehensive statement as to conditions on any one day. Some of the furnaces are suffering also from embargoes against limestone shipments.

While the weather has been moderating since the blizzard of Sunday, with temperatures below zero, it is not expected that shipping conditions will materially improve until really moderate weather arrives. In some quarters it is thought the railroad feel that their congestion can be relieved only by there being less iron and steel produced and shipped, hence they are indifferent to moving coke as the more coke is moved the more iron and steel is offered for shipment.

Long ago the blast furnaces passed the stage of competitive bidding for spot furnace coke in order to keep running, as supplies that could thus be picked up would be only a drop in the bucket, and the common bid now is \$9.00 or \$9.50 for spot furnace coke. If it cannot be had at that price the furnace does without. If a furnace desired to bank and did not have enough coke for the purpose the case would be different and any price might be paid. It is rumored that \$10 was paid on a small lot on Monday for that purpose.

Spot foundry coke is strong on its merits rather than on car supplies, for it frequently occurs now that there is a better supply of box than open cars, and in extreme instances there has even been furnace coke shipped in box cars. While there may have been a few sales of foundry coke late last week at \$10 net to dealers the general position of the market is about \$10.50 to dealers and \$11 to consumers.

There have been no recent negotiations on coke contracts and prices quoted below are simply nominal, being a survival of prices obtaining when the last was a market. If business were to be done, there is no more reason to suppose it would be done at higher prices than at lower prices.

Spot furnace coke, nominal, \$9.00 to \$9.50.
Contract furnace coke, nominal, \$9.00 to \$9.50.
Spot foundry coke, nominal, \$10.00 to \$11.00.
Contract foundry coke, nominal, \$10.00 to \$11.00.

The pig iron market is even more stagnant as to late deliveries, while it is much stiffer as to early deliveries. In the case of foundry and forge, while basic inquiry for early deliveries is appearing, Bessemer remains fairly steady. Prompt foundry and malleable bring \$30.00 to \$35.00. The old quotation of \$29 for Bessemer half has become nominal. It is now from the viewpoint of furnaces but altogether too high from the viewpoint of consumers, as southern foundry iron could be bought at much less.

To Build Large Addition.
The Canton Steel Steel Company, Canton, O., has broken ground for the erection of a large addition in which will be installed open hearth furnaces and blooming mills.

Buy Ella Furnace.
E. W. Mudge & Company, Pittsburgh, have bought controlling interest in Ella furnace, West Middlesex, Pa.

a true tonic and a rich food to overcome tiredness, nourish their nerves and feed their blood. Start with SCOTT'S to-day—and say "NO" to substitutes.

Scott & Bown, Bloomfield, N. J.

COKE TRADE SUMMARY.

Winter laid a heavy embargo on the coke trade of the Connellsville region last week, and the early part of this. By slowing down traffic movement it reduced the car distribution to an average of about 40% the lowest of any single week since the present strike began. Shipments were cut to 200,000 tons, a loss of 20,000 tons for the week, and production was slowed even with shipments.

Good weather kept coke drivers off their jobs at some plants but plenty of coke was drawn to load out all available cars.

Car supply remains around 50% this week, indicating even worse conditions in prospect than prevailed last.

About 25 or 30 furnaces are banked on account of lack of coke and the number is increasing daily. Unless relief comes it is estimated that pig iron production will drop under 50% by the end of the week.

Running supplies of spot furnace coke are being picked up at \$9.00 to \$9.50. For a sufficient quantity to bank a furnace \$10.00 is reported to have been paid. Spot foundry is strong at \$10.50 to \$11.00. There is nothing doing in contract negotiations, prices being nominal at a range of \$9.00 to \$9.50.

STEEL BUYERS MOVE SLOWLY

Waiting to Get Their Bearings on the German Situation; No Cancellation or Postponement of Orders.

Special to The Weekly Courier. NEW YORK, Feb. 7.—The American Metal Market and Daily Iron & Steel Report will review the steel and iron trade tomorrow as follows:

The relatively few members of the iron and steel industry who have journeyed to Washington and formally tendered the use of their plants to the government for war purposes did a graceful thing, but their offers are but typical of the spirit that pervades the entire industry. If rush war orders are to be filled in the next few months the tonnage will represent but a relatively small percentage of the total steel output. The hardship would fall chiefly upon other consumers through somewhat delayed deliveries and undoubtedly would be borne most cheerfully.

In the prospective emergency the government can facilitate the production of steel by regulating the movement of railroads serving the steel industry a large tonnage of steel could thus be created, for the present rate of production is far below normal, and is destined to decrease further, by reason of transportation being inadequate.

Cuts for loading coke, pig iron and finished steel are much scarcer than last week and the movement of loaded cars is slower, a condition arising chiefly from the blizzard that reached the central and west last Sunday. Many additional embargoes have been placed. Connellsville coke shipments this week promise to be less than one-half the requirements and additional furnaces are banking daily. Weeks ago the steel mills began drawing upon reserves of scrap, and pig iron but now see that such resources are likely to prove inadequate in a short time.

The steel market shows no distinct development attributable to the break with Germany. Naturally there is decreased inquiry as men must get their bearings. There is no disposition to ask for cancellation of orders or postponement of shipment. The pressure exerted by buyers for greater shipments is as heavy as ever. Steel production has suffered seriously on account of the cold and the pressure for deliveries is likely to be increased on that account. Export steel shipments have been decreasing since September and there is no definite indication that there will be a further reduction.

ACCIDENTS DECREASED

Inspector Cunningham's District Shows Good Record for 1916.

Mine Inspector Fletcher W. Cunningham, of Somerset, of the Twentieth bituminous inspection district, has announced that there was a big decrease in the number of fatal accidents in the district in 1916. There were only 11 fatalities compared to 35 in 1915. However, in 1916 10 miners lost their lives in the Doevel explosion, leaving but 16 without that extraordinary occurrence. Even deducting the 10 killed at Doevel in 1915 there was a decrease of 31 per cent. for the year 1916.

Inspector Cunningham estimates that the production in the district dropped about 20 per cent. in 1916, due to labor and car shortages. The Twentieth district includes all of Somerset county south of Hollingsport except mines on the Berlin branch.

COAL & COKE SAID TO BE SOLD.

Interests friendly to the B. & O. Said to be the Purchasers.

It has been learned from a source regarded as virtually official that a desirable working agreement will shortly be promulgated by the Baltimore and Ohio and the New York interests which are understood to have purchased the Coal & Coke within the last few days.

This arrangement will involve the construction of a connecting link between the two roads from Sago, on the Coal & Coke, to Hampton, on the Baltimore & Ohio.

It is denied that the Baltimore & Ohio is the real purchaser of the Coal & Coke, but admission is made that the purchasing interests are friendly to the Baltimore & Ohio.

Points Vital to American Life Placed Under Rigorous Guard

Immediately after the diplomatic break with Germany steps were taken by federal, state and municipal authorities throughout the United

states to guard vital water supplies, navy yards, arsenals, bridges, munition factories, etc., from possible attacks by fanatical sympathizers with the Teutonic allies.

No. 1 in the pictures shows guard at entrance to Brooklyn navy yard, largest in America; No. 2, holding up of auto at entrance to Brooklyn bridge; No. 3, naval militiamen on Manhattan bridge.

BUILDING OF THE GREENE COUNTY R. R. IS ASSURED

Officials of the Enterprise Assured Since Location Suit Was Won.

BUY SURVEY OF P. W. & C.

Which Made a Location, Secured Some Rights of Way and Did Some Real Construction Work Several Years Ago; May Begin Condemnation Suits.

Since the decision of Judge H. C. Harvey, of the circuit court at Wheeling, declaring that the Wheeling, Ohio & Eastern Railroad Company has priority of right in its location along Wheeling creek, the announcement has been made in Wheeling that construction of the road is assured. The further announcement is made that the survey and rights of the Pittsburgh, Connellsville & Wheeling Railroad Company, which projected a railroad between Wheeling and the Connellsville coke region some years ago, have been purchased by the Wheeling, Ohio & Eastern company.

The Pittsburgh, Connellsville & Wheeling company not only surveyed and laid out a complete route between Wheeling and the Monongahela river valley, but secured many rights-of-way, and did considerable actual construction work over the route especially in the Wheeling creek valley, in the vicinity of Vio.

Under the laws of Pennsylvania the rights of the Pittsburgh, Connellsville & Wheeling company have not lapsed, and the securing of these rights practically completes the route of the Wheeling, Ohio & Eastern company from Wheeling to the Monongahela river.

A meeting will be held in Waynesburg in the near future, at which the Pittsburgh, Connellsville & Wheeling organization will be revived and the rights and properties transferred to the new company.

The victory of the Wheeling, Ohio & Eastern over the Wheeling Coal Railroad Company, composed of employees of the Pennsylvania system, in the suit decided by Judge H. C. Harvey in favor of the local company, clearly establishes the right to location of the Wheeling, Ohio & Eastern, and the acquisition of the Pittsburgh, Connellsville & Wheeling company's surveys and improvements puts the Wheeling, Ohio & Eastern in a strong position, so far as Pennsylvania territory is concerned, says the Wheeling Intelligencer.

As matters stand, the Wheeling, Ohio & Eastern has a well defined route between Wheeling and the Monongahela river, and with the establishment of its priority of location and in possession of the rights and properties of the Pittsburgh, Connellsville & Wheeling company, some developments of importance in the near future can be expected.

An officer of the Wheeling, Ohio & Eastern company stated a few days ago that the company does not anticipate that any action of the Supreme Court of West Virginia will reverse the finding of Judge Harvey in the suit against the Wheeling Coal Railroad Company. "This places us," he said, "in a position to go ahead without hindrance, and I think, assures the construction of the road."

With the right to condemn now established, the Wheeling, Ohio & Eastern company is now free to institute condemnation proceedings against

Amazing Power of Bon-Opto To Make Weak Eyes Strong Doctor Says It Strengthens Eyesight 50 per cent in One Week's Time in Many Instances

A Free Prescription You Can Have Filled and Use at Home

Victims of eye strain and other eye weaknesses and those who wear glasses, will be glad to know that according to Dr. Lewis there is real hope and help for them. Many whose eyes were failing say they have had their eyes restored by this remarkable prescription, and many who once wore glasses say they have thrown them away. One man says, after using it: "I was almost blind. Could not see to read at all. Now I can read everything without my glasses, and my eyes do not hurt any more. At night they would pain dreadfully. Now they feel fine all the time. It was like a miracle to me." A lady who used it says: "The atmosphere seemed hazy with or without glasses, but after using this prescription for fifteen days everything seems clear as a bell. I can read now without glasses." Another who used it says: "I was bothered with eye strain caused by overworked, tired eyes, which induced fierce headaches. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the type-writing on the machine before me. I can do both now and have discarded my glasses. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the type-writing on the machine before me. I can do both now and have discarded my glasses. I have worn glasses for several years, both for distance and work, and without them I could not read my own name on an envelope or the type-writing on the machine before me. I can do both now and have discarded my glasses."

It is believed that thousands who wear glasses can now discard them in a reasonable time and multitude more will be able to strengthen their eyes so as to be spared the trouble and expense of ever getting glasses. Eye troubles of many descriptions may be wonderfully benefited by the use of this prescription at home. Go to any active drug store and get a bottle of Bon-Opto tablets. Drop one Bon-Opto tablet in a fourth of a glass of water and let it dissolve. With this liquid bathe the eyes two to four times daily. You should notice your eyes clear up perceptibly right from the start, and inflammation and redness will quickly disappear. If your eyes bother you even a little it is your duty to take steps to save them now before it is too late. Many hopelessly blind might have saved their sight if they had cured their eyes in time.

Note: Another prominent physician to whom the above article was submitted, said: "Yes, the Bon-Opto prescription is truly a wonderful eye remedy. Its constituent ingredients are well known to eminent eye specialists and widely prescribed by them. I have used it very successfully in my own practice on patients whose eyes were strained through overwork or fault of vision. I can highly recommend it in case of weak, watery, itching, smarting, itching, burning eyes, redness, blurred vision, or eyes inflamed from exposure to smoke, sun, dust or dirt. It is a safe, potent medicine or secret remedy. It is an official preparation, the formula being printed on the package. The manufacturers guarantee it to strengthen eyesight 50 per cent in one week's time in many instances or refund the money. It can be obtained from any good druggist and is sold in this city by J. C. Moore."

THE OWNERS OF THE LAND WHICH WAS THE SOURCE OF THE DISPUTE AS TO RIGHTS OF LOCATION. The land in question is regarded as a strategic point in the route of the rival roads. The land was bought by the Pennsylvania company, and that corporation will now be made a party to the condemnation suit, it was said.

THINK ADAMSON LAW IS DEAD

Failure of the Supreme Court to Pass Upon It Regarded as Significant; Will Take Time to Consider.

The failure of the Supreme Court of the United States to pass upon the constitutionality of the Adamson act, prior to taking its customary recess of a month was not unexpected by lawyers familiar with its precedents, who have opined all along that that tribunal would decline to lend itself in furthering the scheme of any interest, labor or other. As a Pittsburgh attorney explained its course, it simply refuses to permit itself to be hurried. As to the ultimate fate of the act, however, opinions differ.

Transportation interests interpret the delay by the court in passing upon it as indicative of its rejection, while in brotherhood circles the belief is expressed that the constitutionality will be affirmed when the court shall have recovered, although the wish in this particular instance is probably rather to the thought. As a matter of fact, little interest attaches to the matter longer in either transportation or labor circles since the issue virtually is dead, so eminent an authority as President Lee of the Trainmen's Brotherhood having admitted shortly after the first of the year that a general strike of railroad operating employees could not now be effected, no matter what action their chiefs might prefer.

Meanwhile, too, a truce has been declared between the carriers and men pending the result of the international crisis that impends for the United States, during which mutual concessions will, it is anticipated, be made that will have the effect of allaying the anxieties caused by the friction of last autumn, which was the occasion of the enactment of the Adamson law; so that whatever action the court shall eventually take will not affect the situation appreciably one way or another.

The only significance attaching to the court's failure to pass upon the measure before now, in the opinion of

Vanderbilt.

SOME SPICY SPORT CHATS

How Billy Miske Put One Over
on Jack Dillon.

HE USED AN OLD TRICK

He Dotted Up, Bad Eye and Painted
Wound Over Good One—The Bear
Cat Fell For It—Other Sport Com-
ment.

Not always in the past have the
tricks of the trade in pugilism been of
the sort that the sporting person would
appreciate. Nearly always they have
savored of advantage taking. They
ended in range from greasing the
body to putting cayenne pepper on
the gloves to blind the enemy.

But the trick resorted to by Billy
Miske in his recent bout with Jack
Dillon was justifiable and successful.
It was also a bonus on Jack, the one
time giant killer.

The skin over Mike's left eye had
been slashed in his bout with Charlie
Welter, making a slight wound, but
one that was easily opened and which
then bled freely.

Knowing that Dillon would proceed
to work on it the moment it became
visible, Mike's board of strategy sat
on the case and finally decided to op-
erate.

They dotted up the bad eye until it
was scarcely noticeable, then turned
in and painted a wound over the well
eye, adding a strip of adhesive tape
along the eyebrow.

This drew Dillon's fire immediately
and continuously. Throughout the
fight his unlikeliness was fairly ef-
fective, as was shown by the fact that
he knocked out the tape three times,
so dispatches read. But the eye, being
sound, was not damaged, whereas had
the bad eye been made a target Mike
would have been screaming blood, in-
nuancing the public's view and Mike's
ability to do his best.

The incident probably was funny to
everybody but Dillon, whose sense of
humor may have been ruined by the
popular verdict against him.

Fred Dawson, 1900, was recently
appointed head coach of the freshman
football squad at Princeton. Dawson
at present is engaged in football coach-
ing and is assistant director at Union
college, and he will remain at Science
lady through the college year. While
at Princeton Dawson was an all-around
performer of note, for in addition to
playing quarterback on the eleven he
was captain of the baseball team in
1900. With Bill Clark, the coach, he
wrote a book on college baseball.

Dawson's success as a coach at Union
has been watched closely by the ath-
letic authorities at Princeton. He had
been mentioned for the head coaching
position now held by Speedy Rusk.
Dawson worked wonders at Union.
Not only did he develop a strong foot-
ball team, but he brought out some of
the strongest basketball players in the
college world and lifted Union's ath-
letic status to a place it had never
before approached. Dawson is virile,
singing—a splendid clip, a favorite
with his men and a coach who knows
the game and the secret of teaching it.

Those coaching shoes vacated by Gil-
mour Dobie of the University of Wash-
ington would house a family herd of
an individual. Gil resists without re-
sult of having taught nine seasons with-
out any of his teams having been beat-
en. Yet a man has been found who
will try to fill Dobie's shoes, difficult
as the task has been made. C. J. Hunt,
the hardy individual, is himself quite
a B. B. having had charge of the
Carleton college team of Northfield,
Minn. In three years he has not suf-
fered a defeat. Last season he check-
ed the Big Nine by defeating Stagg's
Chicago university eleven, 7-0.

It takes a very perky individual to
try to set a record against one like
Dobie's, so there's hope for the U. of
Washington after all.

Now it is stated that Francis Oulmet,
the wonder golfer of Brookline, will
never again play for the amateur golf
championship because to render him-
self eligible he will have to abandon
a \$50,000 interest in the sporting goods
store. Considering his youth, the fact
that he has had a business consisting
largely of golf playing since he quit
being a caddy and that he was not a
son of wealth, the acquisition of so con-
siderable a sum will have to be attrib-
uted to his "amateur ability." Having
laid the foundation of his fortune as
an amateur, he may be fairly consid-
ered a professional.

What gets one is the headline dis-
tinction by which "Chick" Evans is per-
mitted to make his fortune as an am-
ateur, yet not suffer the same penalty
as Oulmet.

Not that we care—those lads are en-

abled to all they can make through
extraordinary skill such as they have
acquired by application and hard
work. It's the technical distinction
that gets one.

ANSON'S OPINION ON RULE CHANGES

Captain Anson was asked his
opinion about the rule changes
in baseball suggested by Percy
Haughton.

"Say," he said, "don't let them
take first on three balls. With
some of those southpaws in there
they'd never get the side out."
"About the only change I would
suggest," he continued, "to make
the game faster would be to re-
quire all the batters, except pos-
sibly the first baseman, to do
without gloves. Those huge pl-
tows they wear out down many
a drive that would have been
a hit in the old days. I played
first base for twenty years and
never wore a glove, and I don't
see why they're necessary now,
except for the catchers."

AMERICAN LEAGUE STRONG.

Nearly All Teams Will Have Fighting
Chance This Season.

The American league has been
strengthened from end to end for 1917.
Any one of seven teams will have a
fighting chance to win the pennant—
the Athletics alone being counted out
of the running—and of the seven the
team which beats out the Chicago en-
try will just about cop. Not that Co-
miskey has added any star pitchers or
heavy hitters; he already has both.

It is the element of fight that will
make the White Sox dangerous this
year, an element they lacked the
greater part of last season, and this
element will be furnished by Kid
Glasgow. The Sox braced noticeably
when Glasgow was recalled last sum-
mer. Glasgow did not manage the
club, and he will not be the pilot this
year, but he will be on the job inject-
ing ginger into the howling athletes,
and it was only through the absence
of this that the Windy City brigade
fell short in the campaign which closed
in October.

LOOMIS HUMAN GREYHOUND.

Chicago Sprinter Goes Fifty Yards in
Five and One-Half Seconds.

Joe Loomis, the eloquent all-around
Chicago performer, reports that he is
going better than ever in the short
dash and claims that accounts of his
fifty yard performance at Chicago re-
cently were a bit awry. Joe said that
he snapped the worsted in 5-1-5 sec-

Photo by American Press Association.
JOE LOOMIS READY TO START.

onds instead of in 5-2-5 seconds, as
stated in the report. "The time claimed
by the national champion will consti-
tute a new world's record, if allowed
by the Amateur Athletic union."
Loomis did the fifty yard dash on a
dirt track in 5-2-5 seconds, equaling his
own record on a wooden track made
at St. Louis in 1915.

Loomis is a University of Missouri
athlete, and he was the bright star for
America at the athletic games at Stock-
holm, Sweden. In competition with
the athletes of Scandinavian countries
he clipped one-fifth second off the re-
cord for 110 meter hurdles, making a
new world's mark of 14-5.

Shows Speed on Motorcycle.
J. Booth is reported having covered
a mile in thirty-five seconds on his
motorcycle on an Adelaide (Australia)
road in the recent speedy races there.

AGAINST BOXING LAW.

Governor Whitman Recommends New
York Statute Be Repealed.

It is a message sent to the New York
state senate Governor Whitman urged
the repeal of the Fawcett boxing law,
which was enacted during the Dix ad-
ministration.

The governor said, in effect, that he
regarded the law now on the statute
books as the best that could be devised
for the purpose and added that the
breakdown of the Fawcett law as an
agency for the promotion of clean and
wholesome boxing exhibitions had con-
vinced him that no law could be
framed that would keep public boxing
exhibitions before miscellaneous audi-
ences paying an admission fee within
the bounds of propriety and decorum.

"In the interest of public morals,"
said the governor, "I deem it my duty
to respectfully call the attention of the
legislature to the subject and to ask
for the repeal of this statute."
The governor's message read in part
as follows:

"I am satisfied that this law was
carefully framed, was passed by the
legislature and approved by the gov-
ernor after mature deliberation and
consideration; that no better statute
can be devised which will permit the
giving of boxing bouts as public ex-
hibitions to which an admission fee is
asked and received."

"I am satisfied, and I believe the
members of your honorable body who
were familiar with the events of the
last few years have also become satis-
fied, that public exhibitions of this kind
cannot be held within proper limits
under this statute or under any statute
which permits fighting or boxing in the
presence of miscellaneous audiences
which have gained admission thereto
by the purchase of tickets."

COLLEGE REGATTA JUNE 21.

Poughkeepsie Class to Be Held Day
Before Yale-Harvard Event.

The Poughkeepsie regatta of 1917
will be rowed Thursday, June 21. This
was decided recently at the annual
midwinter meeting of the board of
stewards of the Intercollegiate Rowing
association.

The junior varsity race, wind permit-
ting, will be started at 4:15, the fresh-
man race at 5 and the varsity race at
6:15. The varsity race is scheduled at
a time which will be two hours before
low water—normally when the tide is
at its hardest ebb.

Also the date for the 1918 regatta
was fixed for Tuesday, June 25, and
at the same hours.

This year's date, coming the day be-
fore the Harvard-Yale regatta, is a
near clash, as the New Englanders will
have a couple of unimportant prelimi-
nary races on the Thames also on
June 21.

SISLER IS COMING STAR.

Regarded as Greatest Natural Player of
Modern Times.

Taking a little glance into the fu-
ture, it is not unreasonable to predict
that perhaps even as soon as next sea-
son Sisler will be a worthy rival of
Ty Cobb, Tris Speaker and Joe Jack-
son, so far as attaining the high water
mark in batting is concerned. In the of-
fense and in the field he has more all-
around ability than any of the stars
mentioned.

In fact, Sisler should be regarded as
the greatest natural ball player of mod-
ern times.

HAVE NEVER READ RULES.

At Least Three Baseball Captains
Don't Know 'Em Offhand.

Three major league baseball cap-
tains in a recent discussion admitted
that they had never read the rules, and
four of them admitted that there was
no rule book in the possession of any
man on the trip, so far as they knew.

Baseball is a game that has come to
most of the major league players by
instinct, and they pick up the rules as
they go along. Most of them never for-
get a ruling on an unusual play; but
seldom know the correct interpreta-
tion or wording of a rule.

DUFFY TO COACH HARVARD.

Veteran Ball Player Will Handle Crim-
son Pill Tossers This Season.

Hugh Duffy has been engaged to
coach the Harvard baseball team. The
position was left vacant by the trans-
fer of Fred Mitchell from the Braves
to the management of the Chicago
Cubs.

Duffy in his time was one of the
most celebrated outfielders of fast com-
pany. He managed the White Sox for
a couple of seasons after Fielder Jones
retired. Duffy also managed several
clubs in the international league.

Speaker to Work Hard.
Tris Speaker is going to become a
competitive driver in Ohio for \$3 a day.
Probably needs the money, as he only
gets \$10,000 a season for playing ball.

A Malicious Liar, Regardless of Vocation, Is a Scum of Creation

CAMEL cigarettes are the greatest suc-
cess in the history of the cigarette industry.
Their wonderful sale throughout the length
and breadth of this country has caused
them to be the largest selling brand of cig-
arettes in the world.

We meet competition in a fair and square
way, out in the open, with the best prod-
ucts we know how to manufacture, and
the decision of preference is left to the dis-
crimination of the customer.

In an effort to retard the sale of CAMEL
cigarettes in certain sections of the coun-
try, malicious lies have been circulated
about them.

This company brands any person who
indulges in such unprincipled, low-down
tactics as a malicious liar, and is ready to
stand back of the charge.

\$10,000.00 REWARD

We will give \$500.00 each to the
first twenty persons who will furnish
satisfactory proof of the identity of the
persons who are circulating and who
are being paid to circulate such ru-
mors, together with the names of the
persons, firms or corporations paying
them to circulate a lie to injure the
sale of CAMEL cigarettes.

CAMEL cigarettes are pure and the most
delightful and the most popular cigarettes
ever sold at any price.

CYRUS TOWNSEND BRADY JR.

CIVIL ENGINEER.

CONVENTION BY FLEMING H. REVELL COMPANY

"Now, in the first place," he began, "letting me speak at the same time, you see, one is Mende's absolutely unbounded devotion to his father. The boy was not always right. The boy was as clear as a bell on most things, but I recall that he would maintain his father's propositions tenaciously, determinedly, long after every body, perhaps even the old man himself, had been convinced of their fallacy. Engineering is in Mende's blood. He is the fifth of his family to graduate at Harvard and three of his forebears were engineers. His grandfather, and his father, world-famous. He fairly idolized his father. The affection between them was delightful. The king could do no wrong. Mende was quick-tempered and not very receptive to criticism, but he would take the severest criticism from the old man without a murmur."

"Here we have," said the woman, who had listened with strained attention, "an early revelation to a person and an unbounded respect for his attainments. Go on."

"The next point is, Mende was inordinately proud of his family reputation, especially in the engineering field. Of the two of the line who were not engineers, one was a soldier and a distinguished one, but his career had little interest for Mende. I have heard him say that there had been a steady upward movement in his family, that had reached its culmination in his father. He hoped to be a good, useful engineer, but he never dreamed of going any lighter on the engineering side of the old man's career."

"It was a sort of fetish with him, then, wasn't it?" asked the woman as Rodney stepped aside.

"You have hit it exactly. His love for the man, his admiration for the engineer, which sometimes blinded him, and his pride in his father's career as typifying his family, was unbounded."

"You have established a motive for any sacrifice; love, respect, pride."

"That's the way it presents itself to me. Miss Illingworth. I know thoroughly the quixotic, impulsive, self-sacrificing nature of the man. I know that he would have done anything on earth to save his father, even as the sacrifice of his own career, and since I have seen you I can realize how powerful these motives must have been."

"Rodney said this quite simply, as if it were a matter of course, rather than a compliment, and bluntly as he might have said it to a friend and comrade, and Helen Illingworth understood and was grateful."

"It has been a grief to me that I weighed so little in comparison," she said simply.

"I shouldn't put it that way exactly," observed Rodney carefully. "You see even if it could be shown that it was the old man's fault entirely the young one would still have to share some of the blame."

"You mean he should have foreseen it and planned it out?"

"I think he did, but if he did foresee it and point it out, he should not have allowed the older man to overrule him or force him to accept what he believed to be structurally unsound. I don't know whether he reasoned it out. I don't think he had time to argue the case, the shock was so swift and sudden, but as soon as he did see the situation he discovered that you were lost anyway, except of the charity of your affection, which he could not accept, and that he could save his father. This may all be the wildest speculation, but this is the way it presents itself to me."

"And to me," said Helen, "but before we go any further, let me say I should rather be his wife than enjoy any other fortune."

"That is the kind of affection his quixotic heart would evoke in the mind of a discerning woman."

"Thank you. Will you go on, now?"

"Of course you know that what I have said is not evidence. It is all an assumption, perhaps presumption."

"It is as true as gospel," said the girl earnestly.

"To you and to me, yes. Well," he continued, "I remember that Mende and I were talking just before he went to Burma three years ago about a new book by a German named Schmidt-Chemnitz. In which certain methods of calculations were proposed for the design of bridges. You know it was the opinion of one of the commission members of the committee that gave way."

"Well Mende and I got into a hot discussion over some of Schmidt-Chemnitz's formulas. I maintained that they

were wrong. He took the opposite view. He was right. He was so interested in the matter that after we separated he wrote me a letter about it, adding some new arguments to reinforce his contention. The other day I made a careful search among my papers and by happy chance I found the letter. I was half-convinced by his reasoning then, although the matter was dropped. I am altogether convinced now. His argument is very clear. I have examined since then the plan and sketches for that bridge. The calculations did not agree with those of Schmidt-Chemnitz. His methods were not used. Mende could not have forgotten the matter. I am morally certain that he made a protest to his father, probably in writing, then allowed himself to be persuaded by his father's reasoning. As a matter of fact, I suppose that Bertrand Mende, Sr., was a greater authority on steel bridge design than even Schmidt-Chemnitz. Well, sometimes, the smaller man is right. We know now, and Bertrand Mende, Sr., would admit it if he were alive, that Schmidt-Chemnitz was right, and we can make a good guess that young Mende did not let it pass without a protest."

"Mr. Rodney, it's wonderful."

"Well, that's not all. There was not a little bit of hesitation in Mende's assumption of the blame, not a person who heard it doubted it, apparently. But I was the first man to see the older Mende except his son and Shurtliff."

"Oh, Shurtliff?"

"Well, he came to him presently. It was obvious that the older Mende had been writing. I don't know whether the other noticed it, but it is by no means to take in any detail. The pen was still between his fingers. His hand was constricted and the pen had not dropped out—in fact, I myself took it out and laid it on the desk."

"His last conscious act was to write something, therefore?"

"Yes; for confirmation I ascertained that there were ink-stains on his fingers."

"What did he write and to whom?"

"I don't know. I can only guess."

"What do you guess?"

"The assumption of entire responsibility and the exculpation of his son, probably to some paper."

"From the same motives that prompted Bert?"

"No, because it was true. But that is only an assumption, although not altogether without further evidence."

"And what is that?" asked the woman eagerly.

"She had sat down opposite Rodney at the table and was leaning toward him. Her color came and went, her breathing was rapid and strained under the wild beating of her heart."

"The blotter on the desk. I examined it at my leisure. It had been used some time. I went over it with a magnifying glass. Mende, Sr., had evidently written a letter. I found the words 'fault is mine.' I have the blotter in my desk. The word 'fault' is barely perceptible. 'is' can be made out with difficulty, but 'mine' is quite plain. I am familiar with the older Mende's handwriting, and though this is weaker and feebler and more irregular than was his custom—ordinarily he wrote a bold, free hand—this is unmistakably his. Of course no one can say that he wrote any letter. This is only an assumption, based on assumption, and, furthermore, there is no evidence of any signature having been written beneath it."

"Is that all?"

"There is one more bit of evidence. The sheet of paper on which the design computations for the compression chord members appear was not with the other plans and tracings of the bridge."

"How do you know?"

"These plans were taken over by the Martlet company after Mende's death, and Mr. Curtiss and I examined them. We found that sheet missing."

"It's wonderful!" cried the girl, her eyes shining. "I was convinced before, but if I had not been, you would have persuaded me beyond a doubt."

"I have persuaded myself, too," said Rodney. "But there is not a single thing here that would justify any publicity, even if we were prepared to go against Mende's obvious desire. As I say, it is all assumption. No one can prove it."

"You are wrong," said the girl. "Shurtliff!"

"I wondered if that would occur to you."

"Of course. You think that Mende, Sr., wrote a letter assuming the blame because it was his. I have no doubt in the world now that Bertrand Mende had made his protest in writing. Perhaps he indorsed it on the missing sheet," continued the woman, making bold and brilliant guesses. "Or maybe he wrote a letter that was attached to the sheet that we lack, and Mr. Mende got it out of the safe and wrote his letter and attached it with Bertrand's protest to the missing drawing and gave them to Shurtliff and told him to take them to the papers. You know Shurtliff said that Mende declared he would assume the blame and he sold the reporters so. Shurtliff has or he knows who has the missing paper."

"But what motive would the secretary have for such concealment?"

"He idolized the older Mende. A failure himself when he was a young man, Mr. Mende had faith in him and offered to promote his engineering efforts, but the man preferred to attach himself, personally, to Mr. Mende and so became his private secretary. By his own showing he had been with the dead man on that afternoon. He has the papers."

The woman rose to her feet as she spoke with fine conviction. "I believe you are right," said Rodney, leaning back in his chair and staring at her through his glasses. "If we can only make him speak—But where is he?"

"Working for my father," "What do you mean?"

"I mean that I suspected him from the first, and as there was an opening for a private confidential man, who understood engineering—a vacancy made by the promotion of my father's private secretary—I prevailed upon him to give the position to Shurtliff. Father hates the name of Mende, but he respects efficiency and he knows that Shurtliff is the very incarnation of the particular kind of ability that he desires, so he is with my father constantly and I have him always under my eye. When we go away in the car he goes along."

"But are you going to do?"

"Win his confidence, his affection? I can, appeal to him, and."

"By Jove," said Rodney, "I believe you can do it. You can't drive that old man."

"I know it," said the woman. "You haven't told him that you thought it was his fault?"

"No."

"I couldn't do anything with a man like Shurtliff. You can. You can win his devotion, you can let him see how much the reinstatement of Bert Mende in honor again means to you. You can do it."

"Meanwhile you will help me, won't you?"

"In any way, in every way. Do you know where he has gone?"

"I haven't the slightest idea. He might be in Africa, or South America or out West, or up North. Do you see those flowers?" she pointed to a great bunch of American Beauty roses which had been forced for her apartment, and which she had received of that very day. "Darling, you know, the Madison Avenue florist, sends me a box of magnificent blossoms—roses, vio-

lets, orchids, always different—every week. They speak to me of him."

"Have you ever tried to trace them?"

"No. I know whence they come and that is all. We will hear from him some day, somewhere, somehow. Meanwhile we will work, work, work."

"And you will allow me to say before I go that since I have had this conversation with you I do not see how even love for his father or his family name would have led Mende to do it."

"Don't say anything against him," said Helen Illingworth quickly. "He was mad with anxiety, shame, regret. Whatever he did, I love him just the same."

CHAPTER XIII.

Working Up.

The autumn went by as a dream. Winter, warm and mild in that far Southern clime, was at hand before Mende realized it. An ordinary engineer of half the ability of Bertrand Mende, so suddenly reduced to "the man," would have chafed against the position of subordination and would have resented the humble duties with which he was charged. But Mende was happy to be following, even in this extremely modest way, the profession that he loved. And he did his unimportant work with zeal and care. It is not much to say, but he was the most efficient of the junior engineering force on the dam.

It was not because Mende was unsocial that he kept to himself—not at all. From his own galvanization quarters he used to stare longingly at the men grouped around the big campfires, for the nights were growing chill, smoking and laughing, exchanging experiences and telling stories. Nothing would have pleased him better than to have joined in, and he could have told stories and related experiences that would have been unique even in that gay crowd of young adventurers. But he did not dare. He feared to betray himself. What he wanted above everything was to preserve his incognito. It would be fatal to his chances of ever working up to anything worth while if they found out who he was.

And he had a tremendous pride to sustain him. They respected him now. As a matter of fact, they pitied his withdrawal of himself down to vulgarities of temperament or causes they could not imagine, and they grew rather to like him even as they let him alone. A few of the men of the lumber sort to whom he had been kind on occasion, and helpful, were stantly devoted to him.

The idleness of an aimless life did not appeal to him even in his off-duty periods. Doing nothing had no attraction. He could not get relief that way. Even tramping alone about the hills would not serve. So quick and active a man, so vigorous and buoyant a spirit, so strong a body and mind were not calculated for aimless wandering.

Mende was a very accomplished engineer indeed. There was no branch of the art about which he did not know a little, although hydraulics and structural steel were the things that most appealed to him. He got relief in the duality of his affections for these

branches of his profession. Neither one of them ever pulled on him because he did not work monotonously at either of them. He had a natural instinct for topography, and instead of purposelessly strolling about the country, he made a careful inspection of the valley which was to be converted into a huge reservoir by the dam.

The dam itself was, perhaps, an eighth of a mile long at the bottom and touched the receding hill on one side and the spur of Spanish mesa on the other at the top—a huge mound of earth with a clay core extending from

side to side at the narrowest part of the valley. When completed it would be 125 feet high above the old river bed, with a roadway 20 feet broad on top of it. Below the dam and on the low ground between the mesa and the river's knee the camp, with its centralized shops, bunkhouses, dining halls, kitchens and officers' quarters, had been erected. The configuration of the ground was such that, although it was unusual to put them there, convenience had reduced it desirable to this case.

It was intended to complete the dam before the early spring of next year, which was, if any time in the country could be so characterized, the rainy season. Of course, just as soon as the dam had begun to rise, the flow of the River below it had been stopped, except when an occasional freshet had been allowed to pass the undersides. It was known that the run-off of the river in the rainy season of some years was so small as scarcely to fill the reservoir, and it had been decided to store all the flow of the autumn and winter so that even if the spring rainy season were deficient, the beginning of the next summer would find the reservoir full and the new irrigation system could commence operations successfully.

Underwater, like the lost Abbot of the International, was also a driver, who spared neither his men nor himself. The work had proceeded with astonishing rapidity, although this was partly accounted for by the fact that the spillway, which should have occupied their attention, had as yet been only partially excavated. Now, to those ignorant of engineering, an earth dam may seem a temporary expedient, although most of the great irrigation dams of the world are of that character, and everybody knows that if the water should rise high enough to overflow an earth dam it would not last longer than it takes to describe its utter giving way. A flood would sweep it out of the way at once.

The device whereby possible floods are controlled and such dangers averted, consists of a broad channel at one side of the dam, and at such a distance below its crest that it, through any mischance or natural happening, such as the failure of the sluice gates, excessive rains, cloudbursts, or floods, the height of the water is increased until it is promised to overflow the dam, this opening will carry off the surplus harmlessly. An earth dam without a spillway would preclude almost certain destruction to all who lived in the valley below it.

In the case of the Picket Wire dam, the spillway had to be cut and, in part, blasted out of the mountain side—that is, through the spur of the mesa, which reached down from its high wall towards the narrow. There had been a series of blunders and mishaps, which included the explosion of a shipment of dynamite on the railroad, with very disastrous consequences to accompanying rock crushers and mixers, and other machinery. The spillway had not been completed. Its opening should have been about twelve feet below the level of the dam. Vandewater was not responsible, of course. The chief engineer had flinched and protested, but had been directed by headquarters to go ahead with the other work and tackle the spillway later. There was, indeed, little reason to hold up the building of that particular dam because of the accomplishment of the spillway.

That was a country, so the most devoted inhabitants freely admitted, in which it was always safe to bet that the broken open and the matter how threatening might be the appearance of the sky; for in ninety-nine times out of a hundred the negative would win the bet. Said inhabitants did not say the hundredth time might compensate for all the other failures. The weather was like the little girl with the proverbial curl—when it did rain there was no doubt in anybody's mind as to the fact. Sometimes the fountains of the great deep, which, in Holy Scripture at least, extended overhead, would fall and the quantity of its inundation as of it would be such that the West-archers would graphically call it a "cloudburst," which, indeed, it seemed to be.

The Eavestone, Which Was Sunk by a German U-Boat.

The Eavestone, Which Was Sunk by a German U-Boat.

OCEAN RAIDERS TERROR TO SHIPS

Latest German Rover Recalls
Exploits of Emden and Others.

ESCAPED BRITISH BLOCKADE

Moewe and Karlsruhe Returned to Germany After Their Exploits—Prinz Eitel Friedrich Interned at Hampton Roads—Gallant Commander of Emden Won Admiration of World.

The raids on allied commerce by the mysterious German sea rover which has already claimed a score of victims and whose activities have caused a loss to Germany's oceanic estimated by some as \$40,000,000 recall the other famous commerce raiders which escaped the vigilance of the British blockade and brought terror to mariners.

The Emden and the Moewe, the Prinz Eitel Friedrich and the Karlsruhe—these are names which Germany treasures, to which she thrills as proudly as the Englishman of centuries ago to the mention of the Polken, the Golden Hind or the Revenge.

Raiders all, beneficiaries of the time of quick fires and turbine engines, this quartet has gained the praise and admiration of friend and foe for their exploits. For months each of these four fleet, swift vessels played a lone hand against the greatest navy of the world. For months each was harried and chased from sea to sea. Dodging and bluffing, matching craft and daring against force, they wrought terrible damage to the merchant commerce of the allied nations before their work was through.

War Enemities Admiration. First in order by time and by glory is the Emden. Her captain, Von Muller, is the Drake and the Grenville of the German navy pulled into the Western war began the cruiser was in the Indian Ocean. In the three months before her destruction she harried England more than any other craft that flew the German flag has been able to do in this struggle.

The little cruiser slipped into the harbor of Madras and bombarded the city, firing oil wells, wrecking much government property and spreading a panic among the inhabitants. Then she was gone, while the biggest oil smoke rolled up behind her she ducked like a rabbit across the Indian ocean.

Ran Into Harbor. Then came the most daring feat of her whole wonderful career. With an extra funnel made from cloth she came boldly into the harbor of Penang one day, where three French torpedo boats and a Russian cruiser lay at anchor.

So magnificently audacious was her action that the ships of her enemies never knew what had happened until the torpedo boat Alouette was sunk, the cruiser Terminus was sinking and the Emden had gone.

At last the end came. Trapped at the Cocos Islands, in the south of the Indian ocean, the Emden did not surrender. She came out of her hiding place to meet the more powerful cruiser Sydney with every gun blazing. She went down with them still dawning, but before she died she had accounted for twenty-five merchant ships that the allies could ill afford to lose.

The Karlsruhe followed her. She was another vessel as the Emden, light and fast, with a clever, chivalrous commander. In the fall of 1914 she made the south Atlantic a place of terror to allied vessels. She sunk thirteen, and when her work was done she slipped back to the channel, ran the blockade and returned to Kiel.

Two Raiders Busy. From the Karlsruhe until the last few weeks no German ship of war had sneaked through the steel ring that encloses the North sea, but two ships, merchant vessels in appearance and raiders by virtue of the guns they carried hidden, have gained the open sea and have buried many vessels of England and France there.

Of these the Moewe was the more successful. She trailed up and down the Brazilian coast for months in the fall of 1915 and sank fifteen vessels before she turned her prow homeward.

Count von Dohna-Schloden, her commander, brought her back to the German base with 1,000,000 marks in gold in her hold, with four British officers and twenty-five sailors and marines and 100 non-combatants.

The Prinz Eitel Friedrich had a longer but less spectacular career. She left Tsingtau at the outbreak of war and arrived at Hampton Roads on March 10, 1915. She had accounted for several vessels on her long journey. She dodged the allied war craft that waited outside and entered the harbor, but the watch was so strict that she dared not leave again. Her commander, Captain Thierichsen, interned her.

FEARS FOR LIBERTY BELL

There are sections of the Liberty Bell which are like rotten rock. You could cut out a chunk of the metal with a dull penknife and insert it with a sharp point, and lead pencil," said Wilfred Jordan, curator of Independence hall, in an address before the City History society of Philadelphia, recently.

Mr. Jordan advocated the passage of a bill by the Pennsylvania legislature prohibiting the removal at any time of the bell from its case in Independence hall.

Names in Japan.

The Only Lasting Title a Man Gets Comes When He Dies.

The Japanese have many quaint customs handed down from generation to generation. One of the strangest is that of their naming ceremony. When one month old a Japanese child gets its first name with ceremonial. Trumpets are blown, and the child is borne in great state to the family temple, and behind the procession march the household servants carrying the infant's wardrobe. The servant in the rear of the procession bears a huge box, in which the music fee, together with three slips of paper, on which three names are written. On reaching the temple the names are thrown into the air, and the first that touches the ground is the one which the child receives.

When three years old the child is again named, accompanied by elaborate religious rites. At the age of fifteen his education is supposed to be finished, and as he then enters manhood, (according to Japanese law) he is again named.

When he takes to business he receives his "business" name, by which he is known in the commercial world, and upon every upward step in life he receives a new name. If his master happens

MOUNT PLEASANT COMES TO AID OF DESTITUTE FAMILY

Various Societies Assist Mother
and Five Children Who
Are in Want.

VARIOUS SOCIAL AFFAIRS

Missionary Society of United Presbyterian Sunday School Meets in the Church; Mrs. Bumbough Entertains Church of God Missionary Society.

Special to The Courier.
MOUNT PLEASANT, Feb. 8.—One of the most destitute families that has come to the notice of the Flower Mission in some time was reported to Mrs. D. H. Stoner, secretary. Mrs. Stoner found a family of six, a mother, who is a widow, and five children, the oldest a 15 year old girl, who was working. A stove, table and one bed for six, with a cellar for their house, was the condition the family was found in. Clothing, cooking utensils and food has been furnished by the W. C. T. U.; shoes by the Friendly Society and medical attention has been given the mother. The woman stated that after she became a widow she was told that if she came to Mount Pleasant, rent would be cheap and the girl could get work.

The Missionary Society of the United Presbyterian Church met at the church yesterday. Papers were read by Mrs. William Newell, Mrs. John Barabart and Miss Elizabeth Warden. At New York Meeting.
M. R. George is in New York City attending a hardware association meeting.

To Buy Ladders.
The fire committee of council will buy two suitable ladders for the hook and ladder truck.

Miss Bumbough, host.
Mrs. Elizabeth Bumbough entertained the Church of God Missionary Society yesterday afternoon. Those who took part on the program were Mrs. L. W. Fox and Mrs. G. W. Stoner. The delegates elected to convention are Mrs. Thomas Easton, Mrs. G. W. Stoner, Mrs. J. L. Updegraph and Mrs. J. L. Ruth. Refreshments were served.

Ohiopyle.

OHIOPYLE, Feb. 8.—Miss Charlotte Felton has returned to her home here after spending the past several weeks the guest of relatives in Pittsburgh and Weisburg.

Miss Lilly Joseph of Bear Run, was shopping here yesterday.

The Ladies' Aid Society of the Baptist Church was entertained by Mrs. T. M. Mitchell at her home Wednesday afternoon.

Samuel Martin of Uniontown, was a business caller here yesterday.

The restaurant here has changed hands. Mr. and Mrs. Shaw of Connellsville purchased the business from Mr. Shaffer.

Mrs. D. L. Johnson spent Wednesday shopping and calling on Connellsville friends.

A. A. Corbitt was a business visitor in Connellsville and Uniontown yesterday.

B. A. Shaw who has been in Ohio for the past several months, is visiting with relatives here for several days. Try our classified advertisements.

Jump from Bed in Morning and Drink Hot Water

Tells why everyone should drink
hot water each morning
before breakfast.

Why is man and woman, half the time, feeling nervous, despondent, worried, some days headachy, dull and unstrung; some days really incapacitated by illness.

It we all would practice inside-bathing, what a gratifying change would take place. Instead of thousands of half-sick, apathetic-looking souls with pasty, muddy complexions we should see crowds of happy, healthy, rosy-cheeked people everywhere. The reason is that the human system does not rid itself each day of all the waste which it accumulates under our present mode of living. For every ounce of food and drink taken into the system nearly an ounce of waste material must be carried out, else it ferments and forms poisonous-like poisons which are absorbed into the blood.

Just as necessary as it is to clean the ashes from the furnace each day, before the fire will burn bright and hot, so we must each morning clear the inside organs of the previous day's accumulation of indigestible waste and body toxins. Men and women who stick or will not be advised to drink each morning before breakfast, a glass of real hot water with a teaspoonful of limestone phosphate in it, as a harmless means of washing out of the stomach, liver, kidneys and bowels the indigestible material, waste, sour bile and toxins; thus cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach.

Millions of people who had their turn at constipation, bilious attacks, acid stomach, nervous days and sleepless night have become real cranks about the morning inside bath. A quarter pound of limestone phosphate will not cost much at the drug store, but is sufficient to demonstrate to anyone, its cleansing, sweetening and refreshing effect upon the system.—Adv.
